

## First week (7-13 May 2012)

During the first week, a field study at several agencies was provided so that Thai exchanged students got more experiences about healthcare services in Bali.

Field study at Puskesmas Karangasem. 'Puskesmas' is a public health center that provides healthcare services at a community level.

Also, we had sightseeing to some tourist attractions in Bali, such as temples and cultural park, etc.

Taman Ujung

Tirta Gangga

Tanah Lot Temple

Garuda Wisnu Kencana Cultural Park

Interestingly, students of STIKES were provided as a 'buddy' for Thai exchanged students. Here are some expression of STIKES's buddies.

*I am really excited because all of you are the people from the other country. I'm wondering about your culture and curious to know about that. Thai culture is unique and quite similar to that of Indonesia. Regarding healthcare system, I want to share you. I heard that Thailand already gets advance in health facilities ,so I hope I can get advance knowledge from you.*

*With love.  
Dotu*

*Honestly, overall it is so great moment that I have accompanied you at STIKES BALI. It's so nice to be your friend. During our conversation, we have a lot of joke, laugh together, and share information about our own country. Maybe, I don't have good English ability and you may not understand what I am saying. However, you are so calm, talk less, but you are a funny boy. Without any word come from you, you can make me and my other friends laugh when you do some non-verbal attitude. That's right, trust me! Finally, I want to say thank for allowing me to be your friend. I hope that we can be best friend forever.*

*Ms. Ayu Eva Sil Viadi Putri*
